CUTTING & MILLING 71

STYLE, PERFORMANCE, SERVICE. THAT'S THE FYPON® ADVANTAGE.

INTRODUCTION

Fypon offers a unique way to add distinction with historically accurate products that bring out the best of any home. Each product in this catalog includes the sizing (width, height, length, and projection), a detailed drawing, and the part number for easy ordering. For quick and easy reference, this catalog has been divided into major product categories. If you don't see a product you normally purchase, contact Reeb's Customer Service department to help you find what you need.

INVENTORY

Reeb® stocks an extensive amount of Fypon products because investing in quality decorative millwork means transforming the basic design of a home into a true work of art. From subtle enhancements like eye-catching brackets and balustrades to dramatic archways and exquisite mouldings, quality Fypon products will add to the décor of any home.

POLYURETHANE MILLWORK

The first step in manufacturing polyurethane millwork is to create molds that will be used. A coat of primer paint is sprayed into the mold. Once the primer has dried, the urethane foam is poured into the mold, and then placed in a press. After the foam cures and hardens in the shape, the mold can be removed from the press in preparation for finishing the product. The product is removed from the mold and is inspected for quality. A second coat of primer is applied and the product is boxed and readied for shipment.

FEATURES AND BENEFITS

- Low-maintenance product
- Lightweight and easy to install
- No stain or paint prep needed
- Can be cut, trimmed or shaped like wood using standard woodworking tools
- Resists moisture and insects
- Won't warp, crack, rot or split
- Backed by a lifetime limited warranty

FYPON SERVICE

Building professionals trust Fypon to deliver outstanding customer service and support by providing:

- Drawings and marketing support for blueprints and model homes
- An industry-first quote package program with quantity pricing tool
- Support from Fypon experts and answers to common installation questions
- Custom design services for historical restorations, replicas or any unique profile that fits your home or commercial application.

WINDOW & DOOR TRIM

AN UNFORGETTABLE FIRST IMPRESSION.

Transform the look of any home with Fypon® Window and Door Trim. Designed to work together, these pieces are quick and easy to install.

Fypon offers a wide range of styles and sizes of window and door trim to take the look of a home from ordinary to extraordinary. For the exterior of a home, use Fypon crossheads and pediments to add an extra touch above the doors and windows. Pilasters finish off the side of the doors or windows with a more refined and finished look. Fypon trim creates a customized window while accessories like keystones add additional curb appeal. Fypon shutters are a lightweight polyurethane that is quick and easy to install.

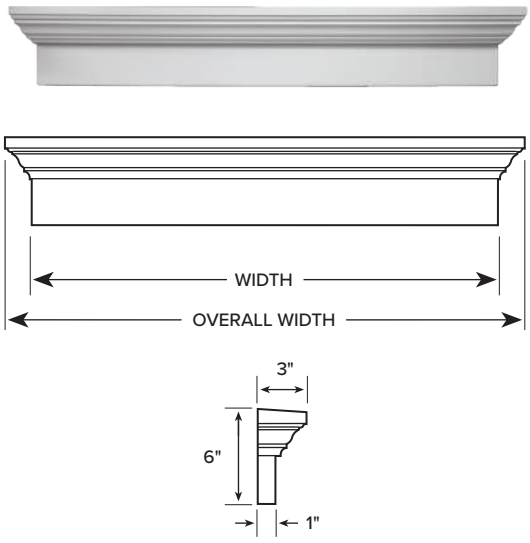

ORDERING

When ordering trim for doors or windows, first measure the door unit to be trimmed. The unit can be measured with or without brickmould, however the brickmould is essential when using a storm door. Next, choose the desired pilaster style and size. Finally, choose a pediment or crosshead that is wide enough to span the opening plus the brickmould and pilasters.

Products in this section are organized by style then width and door surround kits are organized by unit configuration and then by overall unit width. Where applicable, part numbers are shown for products with available unattached accessories.
A urethane-based adhesive must be used on all joint surfaces. For more information, please see page 71.

MOULDINGS

IT'S ALL IN THE DETAILS.

Discover a variety of options, ranging from simple to ornate. Fypon's portfolio of beautiful, inspired styles is available in a range of sizes and combinations, ideal for adding character to any home.

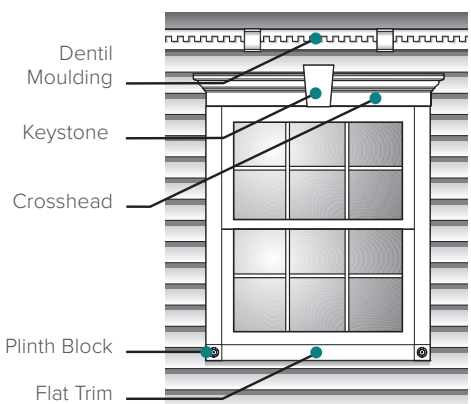

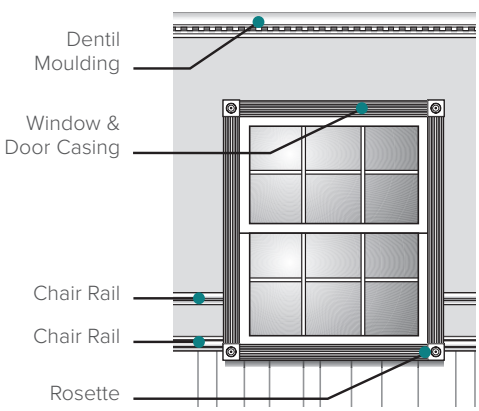

Creating a distinctive look is important. Crown moulding and chair rail create the perfect classic look for a home, with easy installation using standard woodworking tools. All Fypon polyurethane products can be used on the interior or exterior of the home. Each piece has a consistent quality and finish, which requires no additional priming. Once installed, they can be painted or faux finished.

The products in this section of the catalog are organized by moulding type. You can find a variety of products to match the aesthetics of almost any application conveniently grouped together. Where applicable, groups of mouldings are further sorted by height, from smallest to largest. Rosettes or plinth blocks help make moulding installations quick and easy by eliminating the need for patching to create smooth seams. A urethane-based adhesive must be used on all joint surfaces. For more information, please see page 71.

DECORATIVE MILLWORK

DISCOVER UNLIMITED POSSIBILITIES.

Fypon's collection of architecturally correct and historically accurate Decorative Millwork including Brackets, Rafter Tails, Beam Mantels, Dentil Blocks, and other products adds a refined look to both interior and exterior applications.

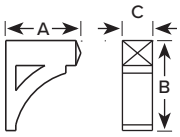

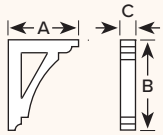

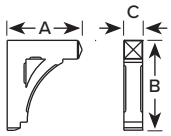

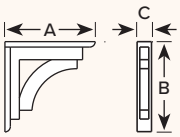

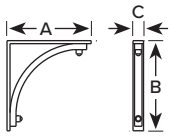

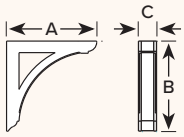

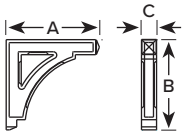

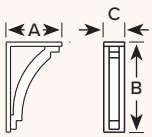

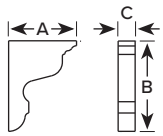

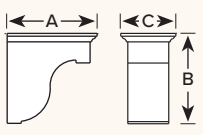

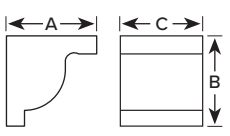

Decorative millwork is the perfect choice to add the finishing touches on interior and exterior applications. These low maintenance details are easy to install with no additional tools or special installation methods needed. Fypon decorative millwork is architecturally accurate and can be painted or stained to fit your needs. Fypon offers decorative brackets in a woodgrain or smooth texture or a smooth dentil block both in many sizes. Also available are rafter tails that will stand up to the elements!

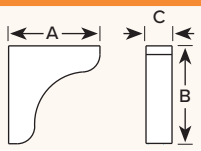

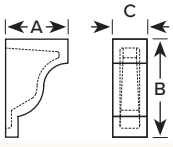

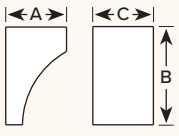

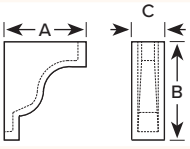

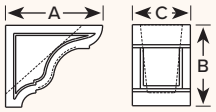

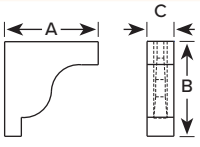

The products in this section of the catalog are organized by product type. You can find a variety of products to match the aesthetics of almost any application conveniently grouped together. A urethane-based adhesive must be used on all joint surfaces. For more information, please see page 71.

LOUVERS

HISTORIC STYLES FOR ANY HOME.

Fypon offers a diverse assortment of Louvers to complement most architectural home styles.

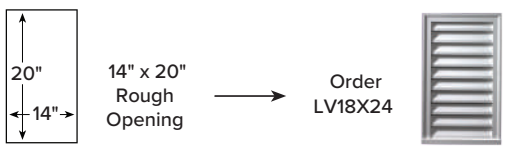

Fypon manufactures two types of louvers - decorative and functional. Decorative louvers have closed, non-ventilating slats that do not allow air to pass through. They are used for decorative purposes only, to accent exterior façade applications.

Functional louvers accent exterior applications, but also have open slats that allow for ventilation. The inside of the functional louver has a non-corrosive screen that helps keep insects out, while allowing airflow between the slats. In addition, accessory pieces such as flat trim and keystones add style and beauty, and are available for most louver styles.

If you are ordering a functional louver, you should order a louver that is approximately 2" larger than your rough opening on all sides. This will allow you to attach the louver to the substrate through the brickmould edge.

The products in this section of the catalog are organized by louver style followed by matching trim. Where applicable, matching keystones are referenced for each louver and trim piece. A urethane-based adhesive must be used on all joint surfaces. For more information, please see page 71.

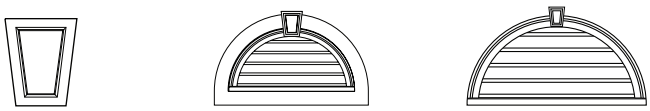

Louvers with a flat trim will use a flat keystone profile.

Keystone
(For Trim Profile)

Keystone for
4F Trim

Louvers with a brickmould trim or with no trim will use a brickmould keystone profile.

BALUSTRADE SYSTEMS

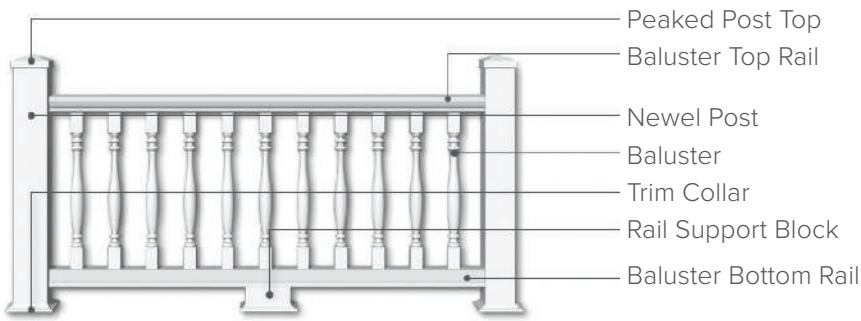

ADD OUTDOOR SOPHISTICATION.

Transform any porch, patio or balcony into an impressive outdoor living area. An eye-catching accent for many home designs, Fypon's Balustrade System is beautiful and durable.

A balustrade system is the combination of the railing (both at the top and bottom), newels (support posts on both sides of the rail section), and balusters (smaller posts between the newels) to form a decorative railing.

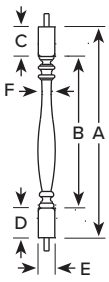

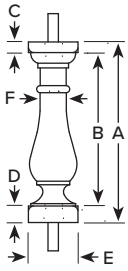

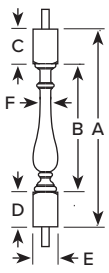

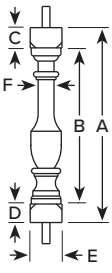

The railing design choice is an aesthetic option. For large spans of rail sections, a support block should be placed under the bottom rail so there is never more than 48” between posts. Each rail section will require two rail installation kits to connect the rail to each newel.

Newel posts will line both ends of each rail section. Each newel requires one Newel Post Installation Kit (NPK) to anchor the base of the post to the substrate. Additional accessories such as caps and trim kits can attach to the newels for an additional flair.

Most local building codes require that balusters be spaced in a way that a 4” ball cannot pass between them at any point. Each baluster design has a maximum center-to-center distance which will ensure that this building code is met. To determine the number of balusters, divide the rail length, in inches, by the center spacing dimension. Any fractional answers should be rounded up to the next whole number.

BAL3X28WF	5"	28"	20"	4"	4"	2-1/2"	1-1/4"	5-1/8"

SQUARE

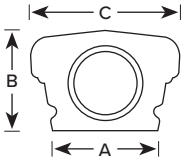

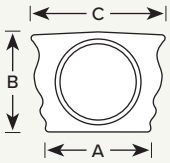

Part Number	Balustrade Rail System	Height (A)	Width (B)	Maximum Center-to-Center Distance
BAL2X20SQ	5"	20"	1-3/4"	5-3/4"
BAL2X28SQ	5"	28"	1-3/4"	5-3/4"

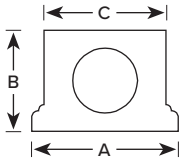

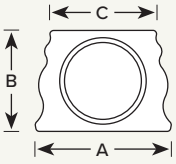

STRAIGHT RAILS

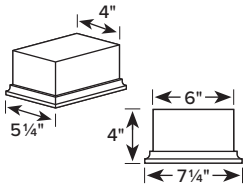

TOP STRAIGHT RAILS

	Part Number	Balustrade Rail System	Length	Bottom Width (A)	Height (B)	Top Width (C)
 	BTR5X96	5"	96"	3-1/4"	3-1/8"	4-5/8"
	BTR5X144	5"	144"	3-1/4"	3-1/8"	4-5/8"
 	BTR7X96	7"	96"	5-1/2"	5-1/4"	7"
	BTR7X120	7"	120"	5-1/2"	5-1/4"	7"
	BTR7X144	7"	144"	5-1/2"	5-1/4"	7"

BOTTOM STRAIGHT RAILS

	Part Number	Balustrade Rail System	Length	Bottom Width (A)	Height (B)	Top Width (C)
 	BBR5X96	5"	96"	4-1/2"	3-1/8"	3-3/4"
	BBR5X144	5"	144"	4-1/2"	3-1/8"	3-3/4"
 	BBR7X96	7"	96"	7"	5-1/4"	5-1/2"
	BBR7X120	7"	120"	7"	5-1/4"	5-1/2"
	BBR7X144	7"	144"	7"	5-1/4"	5-1/2"

INSTALLATION KITS

	Part Number	Balustrade System	Installation Notes
 	RSB4X4X6 Rail Support Block	5", 7", 12"	Install under the Bottom Rail at a span of 48" or less. Dimensions: 4" x 4" x 7-1/4" (may be trimmed for height).
	BRK5 Rail Installation Kit	5"	Connects both ends of one 5" Top or Bottom Rail to support structure. Order two kits per section. Kit Contents: (2) Angle Brackets & Mounting Hardware
	BRK6-7 Rail Installation Kit	7"	Connects both ends of one 7" Top or Bottom Rail to support structure. Order two kits per section. Kit Contents: (2) Angle Brackets & Mounting Hardware

BALUSTRADE SYSTEMS

NEWEL POSTS

	Part Number	Balustrade System	Height (A)	Width (B)
CORNER PANEL				
	NPCP8X48	7"	48"	8"
PLAIN				
	NP6X48	5"	48"	5-1/2"
	NP8X48	7"	48"	7-1/2"
STRAIGHT PANEL				
 	NPSP8X48	7"	48"	8"

INSTALLATION KITS

	Installation Kit	Kit Contents
Newel Post Installation Kits are sold separately from the Newel Posts. Fasteners to mount steel base plate to the floor surface are not provided.	NPK400	Secures one 6" Newel Post to the structural substrate.
	NPK600	Secures one 8" Newel Post to the structural substrate.

POSTS ACCESSORIES

		Part Number	Balustrade System	Bottom Width (A)	Top Width (B)	Height (C)
FANCY PEAKED TOP						
		PST6X6FP	5"	5-7/8"	—	2-1/8"
		PST8X8FP	7"	8-1/8"	—	3"
		PST9X9FP	7"	8-7/8"	—	3"

ADHESIVE

A urethane-based adhesive such as Loctite® PL Premium® Construction Adhesive must be used on all joints when installing urethane products. This will minimize the effects of expansion and contraction on the product. For additional information on adhesives, detailed installation instructions and finishing information, visit fypon.com.

Loctite® PL Premium®
Construction Adhesive - ADH1

CUTTING & MILLING

Fypon polyurethane products can be cut and trimmed with standard woodworking tools, including table saws, circular saws, jig saws, band saws and miter saws. Trimming product will remove the smooth finish and create an exposed polyurethane edge. This edge must be finished with paint or stain to protect the exposed polyurethane from discoloration from the sun. For more information on the installation and care of Fypon products, visit fypon.com.

REEB
LEARNING CENTER

A learning center for everything door related.

Buying a door unit doesn't need to be complicated and either should choosing the perfect millwork accessories to accompany it.

Visit the Learning Center at **learn.reeb.com** to learn more.
