

# **INTERIOR DOORS**

REEB® IN-STOCK INTERIOR PRIMED STILE & RAIL DOORS

### Interior Primed Stile & Rail Doors

Primed stile and rail doors are an ideal choice for homeowners seeking to add a clean look to their Modern, Traditional or Craftsman style homes. They feature architecturally correct layouts, crisp shadow lines and highly defined panels providing a superior level of detail.

Recent developments within the millwork industry continue to strengthen the case for primed stile and rail doors, making them an excellent choice for discerning homeowners seeking increased strength, better durability and greater life expectancy at a similar price point to their molded door counterparts.

# **Construction & Benefits**

#### Stiles, Rails & Veneer

The stiles and rails have a solid wood engineered core for added strength, stability, and reduced sound transmission.

An MDF veneer is permanently bonded to the core resisting dents, dings, and gouges. The veneer when compared to other imitation products makes for a superior and smooth painting surface.

#### **Dowel Pins & Panels**

The stiles and rails are joined by dowel pins. In between the stiles and rails, there can be a flat or raised panel made of MDF for a smooth painted finish or there can be a glass element to allow natural light into the next room.

#### Sharp Details & Architecturally Correct

Primed stile and rail doors join components together to create sharp shadow lines with a 90 degree Shaker sticking.

Each door is made with perfectly proportioned stiles, rails and panels that are created individually to ensure that every door is architecturally correct.

# **Primed Louvers**

Louver doors allow for air flow while providing privacy.

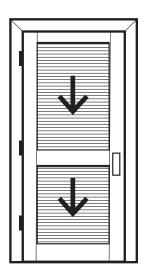

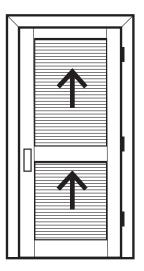

1-1/4" Louver Slats

2-1/2" Louver Slats

When ordering a louver door, it is important to specify which side is the blind side. View the door as if you are in the inside of the room and the door is opening toward you.

When the Blind Side is on the Hinge Side, the Louvers run down, meaning you cannot see into the next room

When the Blind Side is on the Stop Side, the Louvers run up, meaning you can see into the next room.

For Louver Doors with a Contemporary style, featuring a unique slatted ventilation, please see page 22.

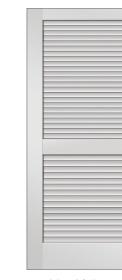

Bifolds are carton packed with track and hardware.

# **Contemporary Doors** MODERN DESIGNS. CLEAN LINES.

Reeb's modern-style contemporary doors are a premium flush door. While traditional flush doors have a thin veneer over a solid particle core, any groove cut into the door for a design appeal must be shallow. Our new contemporary flush doors feature a 1/4" thick veneer. The grooves are cut 1/8" deep resulting in sharper shadow lines and a greater definition.

The contemporary doors have a unique lattice wood core that provides exceptional strength and improved stability. It has the feel of a real wood door without the weight that can lead to hinge issues. These doors can be prepped for the typical backset options or even a mortise pocket.

For a consistent be on the stile line

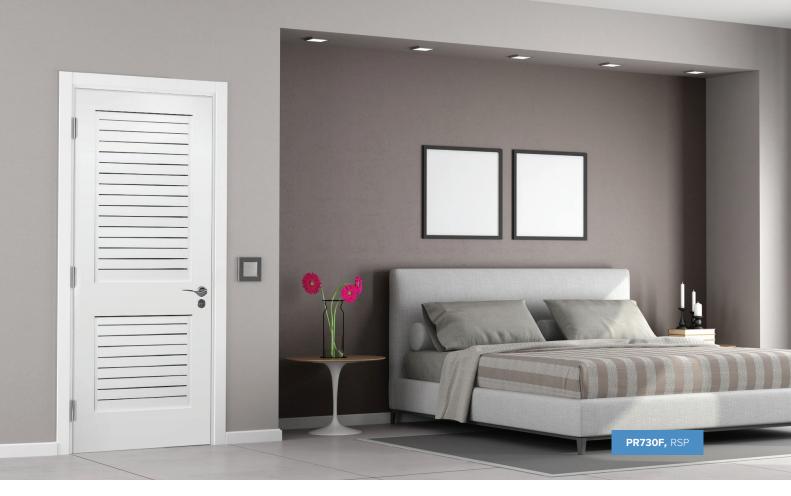

#### PRF2315

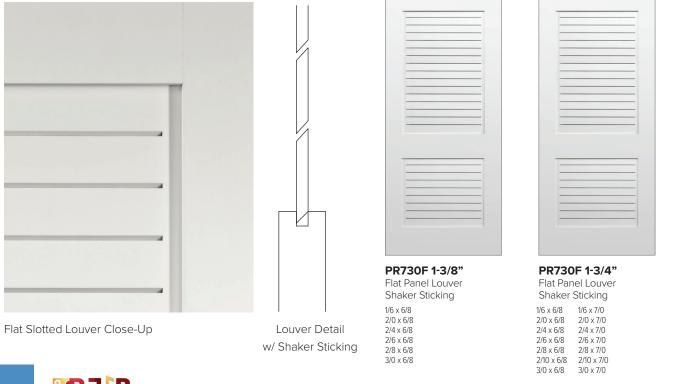

design, the strike side will always side of the door.

# ΗП

PRF2302

Reeb's Contemporary Louver Door has shaker-style sticking and a unique slotted ventilation. Cut at an angle into the panel of the door, flat slotted louvers give the same ventilation possibilities but with a different aesthetic appearance. This contemporary door pairs well with other shaker-style flat panel doors.

### **Rabbeted Frames**

### Single Rabbeted

Single rabbeted jambs mimic the appearance of exterior frames for interior use. This option may not be available in all markets so please confirm availability prior to ordering.

PRIMED

CLEAR PINE

PRIMED SOLID POPLAR

### Double Rabbeted

Double rabbeted jambs work well with either a 1-3/8" or 1-3/4" thick door. This option may not be available in all markets so please confirm availability prior to ordering.

CLEAR PINE

PRIMED SOLID POPLAR

ENGINEERED VERTICAL GRAIN FIR

# **Split Frames**

### Split

Split jambs are two pieces of wood together which work well for odd wall sizes. This option may not be available in all markets so please confirm availability prior to ordering.

#### PRIMED

CLEAR PINE

Because of their construction, a split jamb is able to work for a range of wall sizes. For example, Reeb® stocks a split jamb that has a size range of 4-1/2" to 5-1/4" thick.

Also with split jambs is the availability to use interior casing. When installing a split jamb with casing, the two pieces must be taken apart. This allows Reeb to ship the unit with the casing pre-attached and ready for a complete install. This option may not be available in all markets so please confirm availability prior to ordering.

### Sills

OAK SADDLE SILL

### Oak Saddle Sill

This oak saddle sill is a cost effective option for use on interior door units with weather-strip which provide access to unheated spaces i.e. an unfinished attic.

# Hinges

#### BALL BEARING HINGES

Ball bearing hinges have a steel ball bearing, or buffer, in between the knuckles. Heavier doors put more stress on the hinges so having the ball bearings reduce friction, are better performing and longer lasting.

Ball Bearing Square

Ball Bearing Radius

#### NON BALL BEARING HINGES

Standard, or plain bearing, have no buffer between each knuckle of the barrel. This tends to wear the hinge down over time as the sections grind against one another and are better suited for lightweight doors.

Non Ball Bearing Square

Non Ball Bearing Radius

#### HINGE SIZES

Most interior doors are 1-3/8" thick and use  $3.5'' \times 3.5''$  hinges. On an 1-3/4" door in an interior application Reeb will automatically utilize a 4" hinge.

3.5" x 3.5"

### Baldwin®

Baldwin believes that quality should never be a compromise. From using the finest materials to crafting hardware by hand, they are committed to creating high-quality hardware that not only looks beautiful and flawless but also endures the rigors of time.

# Catches

Catches are an alternative way to close a door and are often used in a closet application. Ball catches and Roller catches are recessed in the top of the door while a Surface Magnetic Catch is installed on the face of the door. A strike is installed on the head jamb and the two keep the door closed without the need of a latch. The Concealed Magnetic Catch is recessed into the top of the door and the head jamb which conceals the catch.

# **EzyJamb**<sup>®</sup>

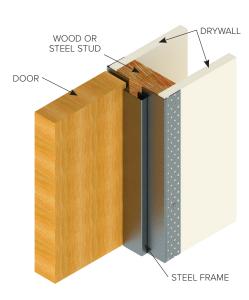

Reeb's newest interior frame option provides a clean "flush with the wall" appearance utilizing concealed door frames and hidden hinges. EzyJamb<sup>®</sup> is a trimless door frame which wraps the drywall and blends seamlessly when mudded and painted. It is a great option for modern and contemporary style homes.

The Classic Adjust Door Frame is an adjustable two-piece jamb system that allows for a 3/8" adjustment between the two pieces. No casing is needed to finish the frame and it must be field installed.

The Classic Adjust Door Frame is available for Reeb's stock of 1-3/4" doors in the following sizes:

DOOR	DOOR WIDTH							
HEIGHT	2/6	2/8	2/10	3/0				
6/8	$\checkmark$	$\checkmark$	$\checkmark$	$\checkmark$				
7/0	$\checkmark$	$\checkmark$	$\checkmark$	$\checkmark$				
8/0	$\checkmark$	$\checkmark$		$\checkmark$				

Reeb's standard frame is set up to work with a wall thickness of 4-1/2" - 4-3/4". Additional closure packages are available to accommodate thicker walls.

WALL THICKNESS						
4-7/8" - 5"	6-1/2" - 6-7/8"					
5" - 5-3/8"	6-7/8" - 7-3/8"					
5-9/16" - 6"	8-1/2" - 8-7/8"					

EzyJamb has the option of two different hinges:

Emtek or Bommer Architectural 4" x 4" hinges

6/8 and 7/0 will have 3 hinges while the 8/0 will have 4 hinges

**Z** EzyJamb EMTEK<sup>®</sup>

RocYork Concealed Hinges

6/8, 7/0, 8/0 will have 3 hinges
